Prefabricated kerbs and skirtings

FOR THE FOOD INDUSTRY, SUPERMARKETS, CATERING, PHARMACEUTICAL

PROTECTION LEVEL 1

Application: catering kitchens, cold rooms, clean rooms, behind machinery, sanitary rooms, washrooms,...

OP10

MATERIALS

ANTI BACTERIAL

• PolySto Sanicoat

PolySto Sanicoat is an antibacterial impact resistant, smooth gelcoat able to resist continuous water loads for very long periods. PolySto Sanicoat is very easy to clean with all regular food industry cleaning products. Heavy stains, marks or scratches can easily be removed with the PolySto Cleaner. In case of damage caused by severe impacts, the PolySto Sanicoat can easily be repaired with the PolySto Repair Kit.

• PolySto Stainless Steel

The complete PolySto range is available in high quality 1,2 mm AISI 304L stainless steel finish. Any other thickness or quality is available on demand. End pieces and corners are finished with expert welding.

SAVE TIME & MONEY

INSTALLATION

- **Save time!** Open your factory faster by using the PolySto system.
- **Save money!** No need to stop your production for refurbishments when you use the PolySto system.
- **Keep it simple!** Easy to install with the PolySto prefab-system, including the accessories, against any surface (sandwich panels, tiles, bricks, stainless steel,..)

Quick and simple installation

PROTECTION LEVEL 2

Application: protection against trolleys in warehouses, cold rooms, supermarkets,...

POLYSTO HARD FIX GLUE

PolySto Hard Fix Glue is Hybrid Polymer based glue developed for PolySto kerbs. PolySto Hard Fix Glue is the perfect glue for the food industry because of its unique characteristics: reacts on humidity, quick drying, flexible but very strong. Anti fungal and water resistant, PolySto Hard Fix Glue can even be applied in ongoing food production rooms because of its lack of solvent or cyanides.

CHARACTERISTICS

Fast and Solid Installation

Impact resistant

Food Safe (HACCP-requirements)

Water resistant

Chemical resistant

Repairable
